

EasyCal

Dissolved Oxygen Calibration Tool

PRODUCT DATASHEET

COMPATIBLE SENSORS

OxyTechw² GAL

OxyTechw² OPT

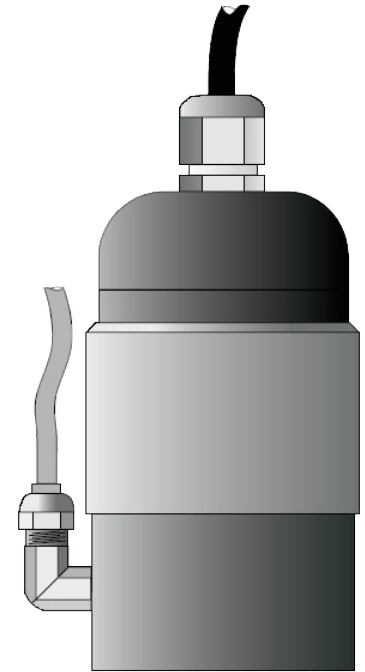

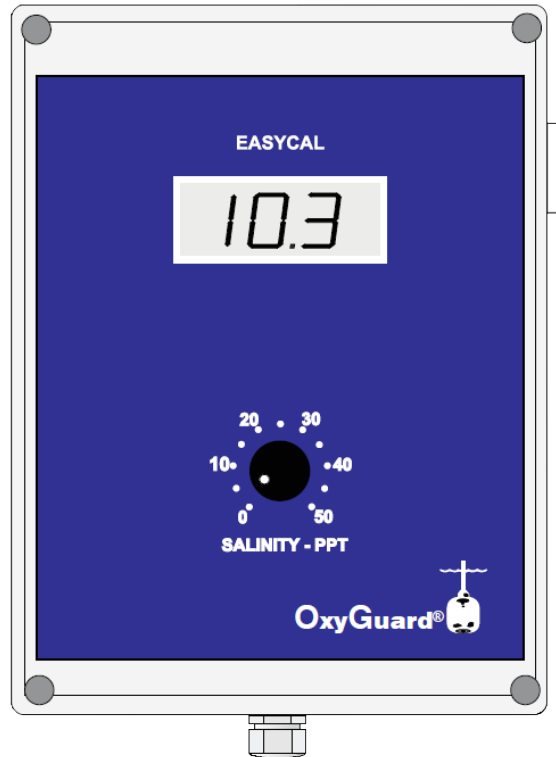

840

810

Oxyguard Atlantic

POWER SUPPLY

Rechargeable Battery

The EasyCal allows calibration of our Dissolved Oxygen probes without the need for measuring temperature, referring to tables or waiting for the probe to stabilize at air temperature. Just place the probe in the holder; return it to the water and switch the EasyCal on. The EasyCal pumps air down to the probe, and after approximately 25 seconds the output of the probe will have stabilized to the saturation value. The DO measurement system can then be calibrated quickly and accurately to the correct value.
